

Installation instructions

1

Installation of the SmartMP profile in the façade insulation system

- Lower the insulation using the SmartMP lowers, otherwise follow the supplier's installation instructions.
- Insert SmartMP Seeker in the center of the profile after mounting.
- Apply plaster, reinforcement and finishing plaster. Follow the supplier's instructions.

2

Use of SmartMP profile in the façade insulation system

- After the application of plaster, reinforcement and finishing plaster, the Smart MP Seeker indicates the center point of the SmartMP profile.
- The mounting area from center point is according to the SmartMP dimension.
- Avoid mounting any screws in a radius of 10 mm from center point.
